The ANENT Learning Management System (LMS)

- The LMS is currently ANENT's primary e-learning platform and course management system.
- It hosts a plethora of automatic systems for enrollment, monitoring and evaluation of participants for much of the online training courses on nuclear science and technology which are facilitated by ANENT.
- The LMS provides various functions allowing teachers to create courses and upload content, modules and other learning materials.

AREAS OF LEARNING

- Human Resource Development
- Outreach
- Energy
- Radiation Technology
- Human Health
- Safety and Security
- Agriculture and Food Security
- Water and Environment

HOW TO CREATE AND ACCESS COURSES ON ANENT LMS

www.anentlms.org

1. Register to ANENT LMS.
2. Send account name to course manager.
3. Wait to be enrolled.
4. Access the course.

anentweb.net mail@anentweb.net

ABOUT ANENT

The Asian Network for Education in Nuclear Technology (ANENT) is a regional partnership supported by the International Atomic Energy Agency (IAEA) for cooperation in capacity building, human resource development and knowledge management in nuclear science and technology. At present, ANENT has 21 member countries in Asia and the Pacific region and 8 collaborating member organizations.
